AXO LABORATORIES LTD., GREENFORD, MIDDLESEX. BYRon 3434

Abridged Particulars for Information only.

Application has been made to the Council of the Stock Exchange, London, for permission to deal in and for quotation for the whole of the issued Preference and Ordinary shares of the Company.

MORGAN BROTHERS (PUBLISHERS) LIMITED

(Incorporated under the Companies Acts 1908 to 1917)

PROPRIETORS AND PUBLISHERS OF TRADE AND TECHNICAL IOURNALS

SHARE CAPITAL Issue	d and
uthorised Fully	Paid
200,000 in 7% Cumulative Preference shares of £1 each £20	0,000
300,000 in Ordinary shares of 5/- each £27	3,250
\$47 \$47	3,250

There are no Mortgages, Debentures or Loan Capital.

The full Advertisement shows, inter alia, that:

1. The business of the Company, which was incorporated on the 30th April, 1929, includes the publication of three weekly journals, "The Ironmonger" and "The Chemist and Druggist" which have been published continuously since 1859, and "The Engineer", which has appeared regularly since 1856. The Company also publishes two monthly journals, "The Chemist and Druggist Export Review" and "Electronic Engineering", also "Kempe's Engineer's Year Book" and other technical books and monographs concerning the industries covered by its weekly and monthly publications.

2. The Company has made steady progress over the past fifteen years and throughout this period the three old-established weekly journals owned by the Company have more than maintained their position as leaders in the industries they serve, and the circulation and advertisement revenue of each of them are higher today than at any time in the last 15 years. During the short period that the Company has owned "Electronic Engineering" its circulation has grown steadily and the number of firms making use of its advertising pages has materially increased.

3. As supplies of paper become more plentiful, it is the intention of the Directors further to improve the appearance and lay-out of the Company's journals and to devote more space to the editorial contents, upon the high standard of which the success of the journals must always depend. This policy is now beginning to operate and the additional expenditure entailed is at present being met by increased revenue.

4. The Directors are of the opinion that the profits for the year ending 31st March, 1950, should approximate to the profits for the year ended 31st March, 1949, which profits, as shown in the Auditors' Report set out in the full advertisement, amounted to £162,631. This opinion is based on the trading results up to the 30th September, 1949, as shown in the Company's interim accounts. These profits would justify the Directors in recommending the payment of an ordinary dividend for the year at the same rate, namely 15 per cent., as for the two years ended 31st March, 1948 and 1949. On the basis of the profit for the year ended 31st March, 1949 (£162,631) and after deduction of the preference dividend (£14,000) the proposed ordinary dividends (£40,988) and Profits Tax at the current rates on these dividends and on the undistributed profits (£27,250), there would remain £80,393, subject to Income Tax, to be carried forward in the Company's accounts.

An interim dividend of 5 per cent, on the Ordinary shares was paid on 1st December, 1949, in respect of the current financial year of the Company.

5. According to the audited balance sheet as at the 31st March, 1949, the net assets, excluding Goodwill, amount to £227,447. Goodwill stands at £385,747 bringing the total net assets, including Goodwill, to £613,194.

A copy of the advertisement giving full particulars as required to be advertised in connection with the application made to the Council of the Stock Exchange, London, for permission to deal in and for quotation for the Preference and Ordinary Shares of the Company, may be had on application to:

Ian Anderson and Nairn, 1, Throgmorton Street, London, E.C.2, and The Stock Exchange

the complex is lacking. In such cases administration of the whole vitamin B complex is to be preferred.

Crookes B-Complex Tablets provide a special strain of yeast, with standardised amounts of vitamin B1 and B2, and nicotinamide.

They are agreeably sugar-coated, thus overcoming

Here are the Johnson twins with DOUBLE sales appli

Johnson's Baby Powder — that you know so well as a consistent seller - now has a twin -Johnson's Baby Lotion! It sets mothers rejoicing and babies cooing all over the world.

Johnson's Baby Lotion makes nappie changing easier - cleaner - quicker. It was first introduced in hospitals and baby clinics to protect babies' tender skin and prevent nappie rash. You can recommend it for sunburn, windburn, chapping and skin irritations.

To every mother who buys Baby Powder, sell her Baby Lotion, too. They'll appreciate these twin aids in baby care, and you make twin sales where you made only one before.

A MOVING PICTURE..

Hiltone's popularity makes it a ready seller and this year's increased press advertising will ensure bigger-than-ever sales. Hiltone's famous slogan "as light as you like... and no lighter" will be seen by millions of women, and country-wide demonstrations will keep Hiltone in their minds. For brightening and lightening the hair to new, natural-looking beauty, Hiltone's controlled action is unequalled. Stock Hiltone, display it—you'll sell it.

Make sure record Christmas and New Year sales tying-in your window and count space with Toni Twin publicity.

HOME PERMANENT

-USED BY 25 MILLION AMERICAN WOMEN!

A PRODUCT OF THE TONI DIVISION OF GILLETTE, ISLEWORTH, MIDDLESES

Why women want this brush

As soon as a woman sees the Beauty Brush she knows it is specially designed for her — made for deep brushing of hair the way the modern woman wears it. The graceful styling of the brush, the setting of the tufts (like spokes in a wheel), the way the rows of tufts spring into action one after another, penetrating deep into the hair and sweeping gently through it — all these attractions make the Beauty Brush a winner with women.

FOR MODERN HAIR STYLES LIKE THESE—

The hair styles of today make correct brushing more important than ever before. To place the hair correctly, to keep it under control, the deep penetrative brushing of an Addis Beauty Brush is invaluable. And these styles are booming!

YOU NEED A BRUSH WITH A ROTARY DEEP-BRUSHING ACTION

Many new styles are upswept and the effortless rotary action of the Beauty Brush is ideal for this. One minute a night with a Beauty Brush quickly trains the hair to place itself, and so makes the best of these new-look hair styles.

HOW WE HELP YOU TO SELL THE BEAUTY BRUSH

Really big advertising is hard at work building up sales for you. Look for it in the Daily Mirror, Daily Express, The People, Evening News, Woman's Own and provincial and local newspapers. Link up with it; display the Beauty Brush in your window and on your counter. Beauty Brush means business!

This handsome display piece will more than earn its keep. It does a real job of selling. Supplied free with order for 6 brushes.

clis beauty brush

Made in 3 jewel-like coloure moonstone blue, zircon green and pink topaz. Retail price 12/6 inc. tax. Wholesale 82/6 per doz. tax extra.

Bottle-fed babies-

Confronted, as he often is with a request for advice upon digestive disturbance when baby is bottle-fed, the Pharmacist may confidently recommend the use of * 'Milk of Magnesia'.

This antacid laxative checks the formation of indigestible protein curds and enables digestion to proceed with comfort.

Thus the baby is contented, receives full nutritional value from each feed and thrives.

NEWS OF THE WEEK

Glucose De-licensing Order. — The lucose (Amendment) Order 1949, in rec from December 11, gives effect to the cision of the Minister of Food (see C. D. November 19, p. 683) to free manucturers and wholesalers of glucose from ensing restrictions.

On Open General Licence.—The Board Trade has now included citrus juices, ape juices and soft fruit juices in the t of goods on open general licence when ported from O.E.E.C. countries and her countries from which imports would be involve loss of dollars or gold.

Christmas Lighting Arrangements.—
ighting for advertisement purposes is to
permitted on December 26 and 27 in
ngland and Wales, and on January 2 and
in Scotland. On those dates electricity
ay be used for illuminating buildings or
remises otherwise than with lamps specid in the Lighting (Restriction) Order,
349.

Medical Research at Hospitals. — The linister of Health has considered with the ledical Research Council the general

policy that should apply to the promotion of medical research at hospitals. He is asking regional hospital boards and management committees not to promote any new research work involving additional expenditure without his prior approval.

E.C.A. Allocation for Plant.—The Economic Co-operation Administration recently approved a project for the purchase of machinery, to be used in a petroleum chemical plant at Grangemouth, involving an outlay of \$9 million in Marshall aid funds for the United Kingdom. The plant will be owned and operated by British Petroleum Chemicals, Ltd., and will manufacture basic organic chemicals,

New Cyclotron at Harwell.—A cyclotron, the largest in Europe, recently completed at the Ministry of Supply's atomic research station, Harwell, Berks, operated successfully on its first full trial on December 5. The machine accelerates protrons (which are about 2,000 times heavier than electrons and more powerful in producing disintegrations) with a voltage of about 160 million volts, but this will be

increased to 180 million volts or more. The machine is a research tool and will be used for conducting experiments concerned with the nature of matter that cannot be conducted in the atomic pile. The workers hope that it will be powerful enough to produce mesons.

Soap Imports Extended.—From January 1, 1950, imports are being permitted, under block licensing arrangements, of certain types of soap and solid shaving soap consigned from and manufactured in countries or territories other than those specifically excluded from the scope of the Board of Trade's notice to importers No. 336, dated September 29, 1949. The imported soap must, where appropriate, comply with the soap rationing regulations and with statutory or other regulations regarding selling prices and distribution generally. Applicants are asked to write in the first instance to the Ministry of Food, Oils and Fats Division, London Road, Stanmore, Middlesex, for fuller particulars.

Royal Society Anniversary.—The 1940 anniversary meeting of the Royal Society was held in London on November 30. Sir Robert Robinson, O.M. (president), presented the Royal and the Society's medal awards for distinguished scientific achievments (see C. & D., November 19, p. 691) and, later, in an address to the meeting, reviewed the advances made in sterinoid chemistry and the contributions of the organic chemist in elucidating the structure of certain vitamins and hormones. He called for new ideas and methods in the search for the synthesis of Cortisone or similar substances, and urged the international organisation of a supreme effort similar to that made in the penicillin field during the war.

British Association of Chemists. — The British Association of Chemists held its thirty-second annual meeting in London on December 3, the president (Mr. Norman Sheldon, A.R.C.S., F.R.I.C.) in the chair. The annual report showed that a number of legal proceedings had been instituted. One member had been assisted to recover £1,500 in compensation for the breaking of a service contract, and another had been supported in a successful High Court action claiming three months' salary on dismissal. The Hinchley medal was presented to Miss Winifred Wright, B.Sc., A.R.I.C., for her work for the Association since its beginnings. Dr. H. Levinstein, M.Sc., Ph.D., F.R.I.C., M.I.Chem.E., was elected *President*.

LOCAL NEWS

Hounslow Branch Secretary. — 1 Lloyd E. Davies, 316 Staines Road, Hou low, Middlesex, has taken over the sec taryship of the Hounslow Branch of Pharmaceutical Society on the resignat (owing to removal from the district) Mr. J. B. Streeter.

Long Service Presentations.—Five a ployees of Edward Taylor, Ltd., Mont Lancs, were presented with inscribed g wrist-watches at a ceremony at the wo recently to mark their completion of years' service with the company. I presentations were made by Mr. F. Haworth, managing director.

Medicines in History.—An exhibit opened recently in the Art Gallery, G gow, illustrates the development of sci tific methods in medicine. Exhibits in pharmacy and medicine section cover period from about 1450 to 1825, and clude advertisements extolling the virt of unorthodox medicines which broufame and wealth to their proprietors.

Bolton Meeting.—" The Application Science in the Detection of Crime", the title of a talk given by Mr. E. Ped (North-west Forensic Laboratory, Prest to the Bolton Pharmaceutical Associat on November 22. The lecture was ill trated by lantern slides and dealt with work the laboratory had accomplished. functions were summarised under the fategories biological, "pure chemistr mechanical and photographic.

Lcicester Visit.—Members of the 1 cester Branch of the Pharmaceutical ciety visited the pathological departm of the Leicester Royal Infirmary recen Dr. E. Ward, pathologist, addressed members on medico-legal pathology. described the duties of a coroner in h ing the causes of death reported. In ca of poisoning, he said, modern analytimethods enabled the cause of death to found in 90-95 per cent. of cases,

Foreign Bodies in Mixture.—A Rep of the Pharmaceutical Services Commit of the Dudley Executive Council alleg that a bottle of medicine supplied to member of the public contained a num of insects was considered by the Council cently. The Committee had found that bottle of medicine contained foreign bow which, it was alleged, were in the bot before the medicine was dispensed. It videcided to send a warning to the chem

gether with a request to examine his esent stock of bottles. It was pointed at that the offence was an isolated one.

Aylesbury N.P.U. Branch Officers.—At e annual meeting of the Aylesbury and orth Bucks Branch of the National narmaceutical Union on November 10, e following officers were elected:—hairman, Mr. G. W. Horsley; Viceairman, Mr. E. J. W. Dale; Secretary, iss H. E. Walker, 46 Well Street, Buckgham. The meeting was addressed by r. H. Steinman (a member of the P.U. Council) on "Matters at the oment." He mentioned the "silent" rvices of the N.P.U. before dealing with e National Health Service and matters ising therefrom.

Pharmaceutical Education in Wales .the November meeting of the Aberdare d Merthyr Branch of the Pharmaceutical ciety, Mr. H. J. V. Haverson (chair-an) presiding, Mr. R. Vernon Lloyd, Pharm., Ph.C. (principal, Welsh College Pharmacy, Cardiff), gave an address on Pharmaceutical Education in Wales. r. Lloyd explained the scope and funcon of the present syllabus before giving a tailed study of the Society's educational licy, with particular reference to its apcation in Wales. Staff shortages at the ollege were also fully discussed and Mr. oyd expressed the hope that the present ficulties would soon be overcome. e discussion that followed there was a nsensus of opinion that members were t generally well-informed on matters of armaceutical education. A vote of anks was proposed by Mr. Haverson and conded by Mr. H. Parry, Nelson.

Address on Immunisation.—At the onthly meeting of the Exeter Branch of Pharmaceutical Society on November , Dr. G. B. Page (medical officer of alth) gave an address entitled "Immuation in Practice, with Special Referce to the Prevention of Diphtheria." insidering the common cold and other ectious illnesses. Dr. Page stressed that munity was relative, varying from day to y, even from hour to hour. Immunisan against diphtheria, although ered thirty years previously, was not de available to the general public until 40. since when cases of the disease and alities from it had shown a marked fall. Exeter, the figures for 1940 were thirtycases and six deaths, but in 1948 only e case was reported, the patient recovering. That showed that immunisation was a potent weapon against diphtheria and that outbreaks in the community were unlikely to occur provided that at least 75 per cent. of children under fifteen years of age were effectively immunised. The modern method was safe and produced no serious side-effects. The talk was preceded by a showing of a Wellcome Foundation, Ltd., film "The Preparation of Diphtheria Antitoxin and Prophylactics."

Society's Secretary at Wembley.—Addressing a meeting of the Wembley Branch of the Pharmaceutical Society on November 22, Mr. Hugh N. Linstead, M.P., said that pharmacists were not "on the way out" as 200 more were coming into the profession every year than were leaving it. Speaking on the proposed is, charge on prescriptions he said "It has been established that the charge will be made per form." He doubted if, in those circumstances, the £10 millions intended to be recovered would, in fact, be possible by that means alone. Demands were being made from many sections of the community for exemption from the charge. Besides old age pensioners, there were diabetics and epileptics, and such cases were under consideration by the Ministry of Health. Mr. Linstead considered that cuts would also be made in dental and optical charges. Ministers concerned with the National Health Service were satisfied that chemists were not overpaid. The physical burden of pricing every N.H.S. prescription was a massive job and impossible with present staffs. The Ministry, he said, might ask for the use of lowercosting drug.

WATER EXERCISES IN POLIO TREATMENT.—Still from the Central Office of Information film illustrating remedial exercises applied in the treatment of poliomyelitis.

IRISH NEWS

Statement on Shilling Levy.—In the Northern Ireland House of Commons on November 22 the Minister of Health and Local Government (Dame Delvia Parker) stated that the precise form and incidence of the proposed shilling levy on medicines under the Health Services Act had not yet been determined.

N.H.S. in N. Ireland.—A report presented to the Northern Ireland General Health Services Board, recently, showed that, during the first year of the Health Service, the 509 pharmaceutical chemists on the Board's list dispensed 3,790,975 prescriptions; the pharmaceutical services cost £835,123 and the Board's grand total was £3,033,545 or £2 4s. 9d. per head of the population.

Distribution of Welfare Foods.—The report of the Select Committee on Public Accounts for the year 1947-48, just published, states that the Committee is not satisfied that the present arrangements for the distribution of welfare foods, etc., are economical or the most efficient that could be devised. The Committee considers that the question of distribution needs examination, especially into the possibility that greater convenience would result from distribution through ordinary trade channels ("grocers, chemists, etc.").

Dail Question on Poisons Control.—In the Dail Eireann, on December 1, Mr. Con Lehane asked the Minister for Health whether he was aware that there was a considerable body of opinion amongst those engaged in the pharmaceutical profession that steps should be taken to tighten up the regulations governing the sale of poisons such as strychnine, and, if so, whether he proposed to take any steps in the matter. Dr. N. Browne, Minister of Health, replied: "I am aware of the unsatisfactory position regarding the sale of poisons such as strychnine. This matter is governed by the Sale of Poisons (Ireland) Act, 1870. Under the Act it is unlawful to sell strychnine to any person unknown to the seller, unless such person is introduced by some person known to the seller. This restriction does not apply to preparations or admixtures or other substances containing any percentage of strychnine. I have received a resolution passed by the Royal College of Physicians under the Act, declaring that such pre-parations shall be deemed to be poisons within the meaning of the Sale of Pois (Ireland) Act, 1870. I propose to confurther with the Royal College of Placians on this matter and to recommend to the Government at an early date to an Order should be made applying provisions of the Act to such preparat I propose also to consider the necessity amending legislation to control the of poisons generally."

Ulster Associates' Section.—The sociates' Section, Ulster Chemists' As ation, has elected the following of bearers and committee:—Chairman, E. B. Williamson, M.P.S.N.I.; Vice-chan, Miss M. Meneely, M.P.S.N.I.; retary, Mr. W. Dinsmore, M.P.S.N.I.; retary, Mr. W. Dinsmore, M.P.S.N.I.; retary, Mr. E. G. Mackle, M.P.S.N.I. Committee, Messrs. V. J. Elliott, M.P.S.N. J. McGivern, M.P.S.N.I.; G. E. McIl ger, M.P.S.N.I. (hospital representat A. McWhinney, M.P.S.N.I., P. Quillan, M.P.S.N.I., T. W. Cresswell, Grimshaw, J. McGlaughlin, C. Ogle, Willman and D. N. Wylie, The followhave been elected to Associateship M.P.S.N.I.: Messrs. U. Eulice, W. Strahan; Assistants:—Miss E. J. Bi H. McKillen; Apprentices:—Messrs. W. Meighan, S. Nemtzov, E. E. Richey.

OVERSEAS NEWS

Indian Science Congress.—The th seventh Indian Science Congress wil held in Poona, January 2-8, 1050.

Aspirin Tax Urged in Sweden.—Swedish company, A. B. Bofors No krut, have urged the government to a customs duty of 15 per cent. of the von all imports of acetylsalicylic acid. fors Nobelkrut agreed to start manufac of the acid during the war when for supplies were cut off. The shortage of commodity immediately after the war now been turned into a surplus. The c pany estimates the duty would only slig increase the price of fifty aspirin tab

Insecticides for the U.S.P.?—Repres atives of the American chemical indu at a recent meeting of the U.S.P. revices committee, opposed a proposal to incl DDT and several other insecticides the new United States Pharmacope Their contention was that including the compounds in the Pharmacope amight sult in their becoming "drugs" under Federal Food, Drug and Cosmetic Act addition to being subject to the exist regulations controlling insecticides.

TOPICAL REFLECTIONS

all for Active Support

In the concluding sentence of the ediorial article on pp. 767-68 you mention hat the Fair Prices Defence Committee alls for the active support of all sections f pharmacy and the drug trade. If any oubt exists regarding the importance of hat support, the Committee's memoranum on the findings of the Committee on tesale Price Maintenance should suffice remove it. The contents of the Governient Committee's report, published on une 2, illustrate the fact that it is posble to evolve an academic argument about ny subject, whatever fallacies the prenises may contain. Examples can be bund in the programmes of local debating ocieties. The Fair Prices Defence Comlittee is broadly based, representing twelve ade associations; its statements are the tore weighty accordingly. But for the act noted here about the possibility of volving an academic argument, I should ave regarded the reasoning of this com-littee as unanswerable. What answer of ny substance can, indeed, be given to the bservation that price control by manufacirers acting individually is quite valuess? Every experienced trader, wholesale nd retail, knows that this is true. Again, hat substantial answer can be given to ne remark that the maintenance of indidual and the abolition of collective rede price maintenance are absolutely reconcilable? "Cut prices and chaos" ould be a grim slogan with which to face te coming year: is that what the Comlittee appointed by the Government deres? I can remember no trade crisis ith clearer issues than this.

fficial Synonyms

Your comments on statutory synonyms 2, 768) raise important questions. The iggestion of including abbreviations of atin titles in the British Pharmacopæia, 914 came from the late Professor J. P. emington, at that time chairman of the nited States Pharmacopæial Convention. urrent synonyms have a national and an iternational relevance. Pharmacopæial anges of name have not always been adde with due regard for the convenience British prescribers and dispensers. Liquid reparations of iodine in the Pharmapæias of 1885, 1898 and 1914 are a otorious example. In the first of these tree books a liniment, a solution and a ncture of iodine appeared, with respective

iodine content of one in about eight w/v, 5 per cent. w/v, and 2.5 per cent. w/v. In the 1898 B.P. the liniment of its predecessor became, with a slight change of formula, strong solution of iodine. In the 1914 B.P. that strong solution became strong tincture of iodine, with a minor alteration in strength. In the 1932 B.P. both tinctures were renamed solutions. The international aspect of changes in name has a separate and an increasing import-ance. In every case in which the international title of a preparation is not identical with its title in the British Pharmacopæia, the international title and abbreviation (if any) should, I suggest, appear after the official British title and abbreviations. The matter is one of a number on which cooperation is needed, not only between the international and national pharmacopæial authorities, but also between those bodies and the national poisons boards or equivalent bodies.

Multiple Prescribing

A significant anecdote, taken from "The Lancet," appears on p. 769. This hospital patient's cornucopia of medicines might form the subject of a question in a course of biological chemistry. Students could be asked to prepare an equation showing the estimated chemical reaction in vitro between phenobarbitone, thyroid, dienæstrol, diluted hydrochloric acid, penicillin, potassium citrate and potassium bromide, administered at varying intervals during twenty-four hours. To demand an estimate of the corresponding reaction in vivo would be asking too much. It might be of interest to have the names of the "three other drugs" originally on this generous list. Some advertisers of proprietary medicines in the past have added specifics, on no obvious principle, to their repertory, and in publishing testimonials have failed to exercise a sense of humour-if they possessed one. When the more intelligent of their readers learned, for instance, that Mr. X had consumed the contents of twenty-two bottles of Mr. Y's cough linctus and was keeping a twenty-third bottle in readiness, they may have wondered how it was that Mr. X took so long to get the better of his cough. Mutatis mutandis, some such doubt is likely to cross the mind of a prescriber who scans a collection of prescriptions like that cited by "The Lan-cet" contributor alluded to. It appears to be our old friend the blunderbuss preparation again. Xrayser

NEW COMPANIES

J. Bass (Chemists and Opticians), Ltd. (P.C.).—Capital £500. To carry on the business of chemists, druggists, opticians, etc. Joseph Bass, M.P.S., 305 Eastern Avenue, Ilford, and Frank J. Trafford, M.P.S., directors.

A. C. GARDNER (CHEMISTS), LTD. (P.C.).
—Capital £1,000. To carry on the business of wholesale or retail chemists, etc. Ivy F. Ll. Gardner and Thomas H. Davies, M.P.S., directors. R.O.: 12 Kingsholm Road, Gloucester.

BARNET CHEMISTS, LTD. (P.C.).—Capital £100. To carry on the business of dispensing chemists, etc. Norman H. H. Rymer and Alexander Innes, M.P.S., directors. R.O.: 96 East Barnet Road, New Barnet, Herts.

C. F. GERHARDT, LTD. (P.C.).—Capital £12,500. To acquire the business of drug merchants carried on by C. F. G. (Fenchurch Street), Ltd., at 5 Fenchurch Street, E.C.3. Edward G. Misani and Robert A. Logie, directors.

J. WILLIAMS (GLASGOW), LTD. (P.C.).—Registered in Edinburgh, Capital £300. To carry on the business of wholesale and retail chemists, etc. Joseph Williams, M.P.S., and Ellen Williams, directors. R.O.: 83 London Road, Glasgow, C.I.

COLIN CAMPBELL (CHEMIST), LTD. (P.C.).—Capital £3,000. To carry on the business of wholesale and retail chemists, etc. Colin Campbell, M.P.S., and Charles J. Strong, M.P.S., directors. R.O.: 246 Blackfen Road, Sidcup, Kent.

P. G. MORGAN (WHITCHURCH), LTD. (P.C.).—Capital £5,000. To acquire the business of chemists, druggists, etc., carried on by the trustees of Percy G. Morgan, deceased, at Whitchurch, Salop. Bona D. Morgan, Robert C. Smith and David I. F. Evans, M.P.S., directors.

LAURENCE & DAVIES (CHEMISTS), LTD. (P.C.).—Capital £2,000. To carry on the business of manufacturing and dispensing chemists, etc. Reginald A. F. Laurence, M.P.S., and John H. Davies, directors. R.O.: 5 Cotham Hill, Redland, Bristol.

E. G. BRYANT (BROCKHAM), LTD. (P.C.). —Capital £1,250. To carry on the business of manufacturing and dispensing chemists and druggists, etc. Ernest G. Bryant, B.Sc., D.Pharm. (Nancy), Ph.C., and Elenor M. Homewood, directors. R.O.: Fern Villa, Brockham Green, Betchworth, Surrey.

Company News

GILLETTE INDUSTRIES, LTD.—Mr. He Garnett has been appointed a directo

EVANS MEDICAL SUPPLIES, LTD.—Steholders of the company at special class extraordinary general meetings, held Liverpool on December 1, approved posals (see C. & D., November 19, p. 6 covering variations in the capital.

BUSINESS CHANGES

MR. A. COCKBURN, M.P.S., form medical representative with Pharmaceut Specialities (May & Baker), Ltd., shortly leaving for British East Africa join Grayson & Co., Ltd., Nairobi.

MR. A. J. STANLEY, M.P.S., has posed of all his retail businesses to devhis full time to the affairs of Warren, Sley & Co., Ltd., wholesale chemists, High Street, Edgware, Middlesex, which he is managing director.

THOMAS KERFOOT & Co., LTD. h appointed Mr. E. H. Tilley, Ivelb Buckden, Hunts, to succeed Mr. W. Heyworth, M.P.S., as representative in I Anglia. Mr. Heyworth has been appoir medical representative in Northern I land in succession to Mr. W. M. Lori who some months ago was transferred London and the Home Counties.

INQUESTS

Wrong Cylinder.—At an inquest at I wich on December 6 on a man who c in Norfolk and Norwich Hospital a nitrous oxide had been administered him instead of oxygen during an operat through a mistake in the identity of a cylinder, a verdict of "death due to r adventure" was returned. The coro commented "I am bound to think the was carelessness."

Sulphone Poisoning.—A verdict "Death by misadventure" was returned an inquest at Leamington recently on infant daughter of a veterinary surgeon Whitnash Warwicks, who died in hosp from sulphone poisoning. The father s that in his absence his child had ta from a pocket in his car a tube contain a sulphone drug and had applied it to face. A pathologist said that the chad swallowed a quantity of the dreath was due to a consequent respirat failure.

THE WEEK IN PARLIAMENT

By a Member of the Press Gallery, House of Commons

IR. DE LA BERE asked the Minister of bod on November 28 what quantities, in rms of sugar, glucose and cocoa beans, id been imported into this country in the rm of semi-raw materials, and why he d not preferably grant the sterling induced in the form of raw materials.

MR. JOHN STRACHEY: As the semi-raw aterials are not separately specified in e Customs classification of imports, I am raid that the figures required are not ailable. The materials are imported by ivate traders, and I see no reason to

ohibit the importations.

MR. DE LA BERE: Is the Minister aware at there is widespread consternation nong large numbers of private traders id manufacturers today as to what is ing on? Will he give an undertaking look into this matter more closely with view to seeing that some of the inequalisar are adjusted?—"I can always look to it, of course," replied Mr. Strachey.

iabetic Chocolate

COMMANDER A. NOBLE asked the Minister Food on November 30 why there was a ortage of the rationed chocolate specially epared for diabetics. Dr. Edith Sumbraskill (Parliamentary Secretary) replied at the supply of diabetic chocolate was nited by the availability of sorbitoliere was little prospect of obtaining ditional supplies.

y-as-You-Earn "Disincentives"

MR. JOHN HAIRE asked the Chancellor the Exchequer on December 1 if he old set up a committee to investigate to lat extent the adoption of pay-as-yourn had had disincentive effects in each dustry. MR. GLENVIL HALL (Financial cretary to the Treasury) declined to do

He reminded Mr. Haire of the subuntial reductions in tax under P.A.Y.E. at had been made in the 1948 Budget, hen the earned-income relief was increased one-fifth, and the nucleus chargeable

6s. had been extended to £200. When MR. HAIRE further asked if Mr. all was aware that many people in the untry claimed that there was a disinntive effect, particularly with regard to muses and overtime rates, and whether it ould not be desirable to establish the cts, "Nobody likes paying tax—we do to need a committee of investigation to tablish that," replied MR. HALL.

Freight Charges

In the Transport debate on December 1, MR. Alfred Barnes (Minister of Transport) said it was difficult to ascertain the incidence of an increase such as higher railway freight charges and their effect on export goods. Most of those goods—particularly for the American market—were of a consumer character and represented high quality and fairly high prices. He thought the main weight of the increase would fall on the heavy industrial products that represented the main traffic of the railways.

Pre-trading Expenses

Mr. P. L. E. Shurmer asked the Chancellor of the Exchequer on December 1 if he would consider granting to new traders the allowance of certain pre-trading expenses (where it could be proved that delay in commencing to trade was solely due to shortage of materials and hold-ups in obtaining licences from Departments) so as to obviate double double taxation and hardship on the new trader. Mr. Glenvil HALL (Financial Secretary to the Treasury) replied that expenses incurred prior to trading were not deductible in computing profits for tax purposes—such expenses might arise from various causes, and he could not authorise any departure from the rule in the circumstances suggested.

Chloromycetin

MR. R. ROBINSON asked the Minister of Health on December 1 why Chloromycetin was no longer available to patients under the National Health Service in cases where it was prescribed by their doctors. Mr. Arthur Blenkinsop (Parliamentary Secretary) replied that, in order to ensure that that scarce and expensive drug was used to the best advantage, he had arranged to purchase all available supplies and to distribute them through Regional Hospital Board centres. The boards had discretion to make supplies available, through the distribution centres, to practitioners in domiciliary practice in exceptional cases.

No Sugar for Shop-workers' Tea

THE MINISTER OF FOOD (Mr. John Strachey) informed COMMANDER A. H. P. NOBLE on December 5 that he would not sanction a small sugar allowance to shop and office workers (who already receive allowances of milk and tea for their duty hours).

DEATHS

ARGLES. — On November 20, eleven days after the death of his wife, Mr. Woodfield Henry Argles, M.P.S., Homecliffe, Alma Road, Herne Bay, Kent, aged eighty. Mr. Argles was formerly in business in Fleet Street, London, and at Brentford, Middlesex. He retired in 1946.

BATTLE.—On November 28, Mr. Harold Marfleet Battle, Westholme, Church Lane, Lincoln, chairman of Battles, Ltd., chemists, Lincoln, aged seventy. For many years Mr. Battle was associated with H. Newsom, Sons & Co., Ltd., but removed from Bedford to Lincoln on the death of his brother (Mr. Cyril Marfleet Battle), fifteen years ago, in order to take control of Messrs. Battles. He is survived by his widow, a son and a daughter.

Doble.—At a Bath hospital on December 1, Mr. Arthur Glendower Doble, aged seventy-nine. After qualifying as a chemist and druggist in 1891, Mr. Doble established himself in business in South Africa, where he remained for fifteen years. Returning to this country, he opened the Widcombe Pharmacy, Bath, which he conducted for twenty years prior to his retirement about five years ago. The business (A. G. Doble & Son) is now under the proprietorship of Mr. H. T. Doble, M.P.S. (a son).

FAULKNER. — On November 12, Mr. Donald Faulkner, M.P.S., 52 Rokeby Avenue, Anlaby Park Road, Hull, aged thirty-eight.

Hamblen. — On November 21, Mr. Richard Ruthven Painter Hamblen. 13A Vale Road, Bournemouth, formerly of Brixton Road, London, S.W.9, aged seventy. Mr. Hamblen qualified as a chemist and druggist in 1902. He retired from business in 1936.

Hughes.—At 27 Shelley Road, Bath, recently, Mr. Thomas J. Hughes. Mr. Hughes was for thirty years employed by Steele & Marsh, chemists, 6 Milsom Street, Bath. When the business was taken over by Boots, Ltd., he continued in employment there until his retirement in 1946.

IRVINE.—At his home, 112 Beaufort Street, Chelsea, London, S.W.3. on December 5. Mr. Peter Irvine, Ph.C., aged seventy-three. Mr. Irvine studied pharmacy under Mr. John Lothian, Ph.C., at the Clasgow School of Pharmacy, and qualified in 1898, passing the Pharmaceutical Chemist examination two years later. He

was for a time pharmacist at the Ruc Fever Hospital, Glasgow, and later propi tor of the old-established City business Wallace & Co., Glasgow. Subsequently joined the United Drug Co., Ltd., Notti ham, as representative in Scotland. Dur the first world war Mr. Irvine served in Royal Army Medical Corps. He was in front line at the time of the first gas atta by the Germans, and became a Gas Defe Officer. Mr. Irvine had marked gifts an entertainer, and was the leading sp in a Forces concert party known as "Duds." At the battle of Ypres he gain distinction by going in under fire in a lo to rescue the company's grand piano. a peace-time entertainer it was said of l that "no Smoker was complete with him." After the war, Mr. Irvine rejoir the United Drug Co. as representative the South of England. During the 1939 war Mr. Irvine served in the Home Gua and claimed to be its oldest member Wiltshire. He was responsible for train his company in first-aid and stretcher dr Mrs. Irvine, who survives him, is a papresident of the Pharmaceutical Society The funeral was at Putney Vale Cemeter on December 8.

MARCHANT. — Recently, following accident, Mr. Walter Marchant, M.P. 209 Barton Street, Gloucester, as eighty-one. Mr. Marchant was actively agaged in business up to the time of death.

TAYLOR.—At 24 Cairnfield Place, Ab deen, on November 23, Mrs. M. A. Spence Taylor, daughter of the late M James Spence, M.P.S., Aberdeen.

Thomas.—At 124 Henry Street, Bloe fontein, Orange Free State, South Afri on November 26, Mr. John Austin Thom aged seventy-six. Mr. Thomas qualified a chemist and druggist in 1895; he er grated to South Africa and was for mayears with Cameron & Hamilton, Ca Town. He passed away peacefully after illness lasting approximately three mont The cremation took place at the Johann burg crematorium on November 29.

Young.—On November 16, Mr. Edwa Young, Ph.C., Clevedon Mansions, Hig gate Road, London, N.W.5, aged eight three. Mr. Young qualified as a chem and druggist in 1887 and passed the Phamaceutical Chemist examination the flowing year.

PERSONALITIES

SIR ROBERT ROBINSON, O.M., has been e-elected *President* of the Royal Society.

MR. ALFRED G. HOWARD, who has rered from the board of directors of lowards & Sons, Ltd. (see C. & D., ecember 3, p. 760), recently completed venty years with the company. Son of

ne late Joseph Howard, M.P., and grandn of the late John Eliot Howard, F.R.S.,
ne eminent quinologist, he was educated
Tonbridge and University College,
ondon, entered the works of Howards &
ons at Stratford in 1880 and was nominad to partnership by his grandfather on
nuary 1, 1883. He was personally reonsible for planning, laying out and
uilding the company's works at Ilford
uring the first thirty years of their delopment, and was chairman of the comany from 1916 to 1941. Although eightyght years of age, he still frequently comes
the works and takes an active interest
the latest developments. The presentaon portrait here reproduced was painted
cently by Edward Nelson.

MR. CHARLES O'HAGAN, M.P.S.N.I., ewry, recently celebrated his eighty-first rthday. Mr. O'Hagan travels daily by as to his business (O'Hagan & O'Hare, fill Street, Newry).

MR. J. E. CONNOR, J.P., M.P.S.N.I., nior director of S. Connor & Sons, Ltd.,

Newry, co. Down, Northern Ireland, recently celebrated his eighty-third birthday. Mr. Connor, who holds the distinction of having been president of the Pharmaceutical Societies of both Ireland and (later) Northern Ireland, continues to act in an advisory capacity in his business.

MISS BARBARA GRANT, a member of the publicity staff of Yardley & Co., Ltd., is shortly sailing for Latin America and the West Indies, where she is to lecture to sales staffs of stores on the company's products and how to use them.

Professor James Small, D.Sc., of Queen's University, Belfast, has published in "Acta Biotheoretica," 1949.9, parts 1-2, the fifteenth section ("Numerical Evolution") of his work on Quantitative Evolution. The seventeenth section ("The Shape and Pattern of Evolution") has been published in "Phyton," Volume 1.

MR. PHILIP LE QUESNE, owner of a pharmacy at Halkett Place, St. Helier, Jersey, C.I., has resigned from the presidency of the Public Instruction Committee of the Island of Jersey because of ill-health. He was taken ill with sunstroke during July 1949 and subsequently contracted pneumonia, from the effects of which he has not yet fully recovered.

Mr. Frank T. West, secretary to the Cheshire Executive Committee, is to retire on March 31, 1950, after thirty-eight years' service in the county. In 1912 he was appointed the first secretary and treasurer of the Cheshire Insurance Committee, and from 1939 to 1947 he acted as administrative officer of the Cheshire Protection of Practices Committee and secretary and administrative officer of the Cheshire County Pharmaceutical War Committee. He has also served on the South-west Lancashire and Cheshire Joint (Prescriptions) Committee, and the Cheshire and North Wales Joint Committee for Diagnostic Facilities. In 1933 he was presented by the Insurance Committee with an illuminated address to mark his twenty-one years' service, and in 1948 he received a silver tea service from the (doctors') Panel Committee in recognition of his services during the whole period of the National Health Insurance, Mr. West says that he has seen the insured population in his area rise from 250,000 to 780,000 and the annual expenditure rise from £530,000 to an estimated £2,352,255.

TRADE NOTES

Name of a Company. — The Denver Chemical Manufacturing Co., 12 Carlisle Road, N.W.o, point out that the firm's title is as here given.

Oxygenated Henna Shampoo.—Kathleen Court (England), Ltd., 19 Thames Street, Hampton, Middlesex, are advertising in the Press their new Hennafoam shampoo.

Comb Display Stand.—Jarrett, Rainsford & Laughton, Ltd., Kent Street, Birmingham, 5, are sending a display stand free with each one-quarter gross Ladye Jayne combs ordered now from wholesalers:

Individual Packaging Service.—Arthur H. Cox & Co., Ltd., Brighton, draw attention on another page to the individual packaging service they provide for their chemist customers.

Advertising Campaign. — J. C. Eno, Ltd., Watford, sole distributors for the Thermogene Co., Ltd., Haywards Heath, are advertising Thermogene rub for children extensively in National newspapers during the winter.

New Pack.—Raywarp Textiles, Ltd., Alfred Street North, Nottingham, are now issuing their R7 slumber net with elastic chin strap in a smaller sized 3-doz. counter display outer. The quality of the product has been improved without change in price.

Gee's Linctus Pastilles. — Rodmill Chemical Co., Ltd., 49 St. Anne Street, Liverpool, 3, have introduced Gee's linctus pastilles (two pastilles equivalent to a dose of the linctus) in colourful tins. They are issued in display outers of 1 doz.

Cleanser for Nylons.—Rose Petal Production Co., 40 Fulham High Street, London, S.W.6, have introduced Rose Petal Wash as a cleanser for nylon stockings; it is claimed to give them added durability. Each transparent packet (overprinted with a rose design) is enough for twenty washes or more.

Catalogues Wanted. — Mr. Rex Howarth, M.P.S., who has recently taken up an appointment as chief pharmacist to the Kuwait Oil Co., Kuwait, Persian Gulf, seeks price lists, medical literature, and catalogues of dispensing equipment and accessories to assist him in stocking and fitting up a pharmaceutical department.

Vitamin B₁₂ Concentrate.—Glaxo Laboratories, Ltd., Greenford, announce that

Cytamen, a concentrate of vitamin B₁₂ tained from deep fermentation of mould Streptomyces was launched on cember 5. The product is a practical re of the isolation of crystalline vitamin (from liver) achieved simultaneously in 1 by Dr. E. Lester Smith (senior biocher of the company) and by an American te plus later knowledge gained in laborat and clinical work. Each 1-c.c. ampoule Cytamen contains 20 microgm. equival of vitamin B₁₂, standardised by microl logical assay and clinically tested. product is supplied in boxes of six a poules.

British-made Hydrazine.—A member the B.C.B. group of companies (i.e., Bri Chemicals & Biologicals, Ltd., 43 Reg Street, Loughborough) has completed erection of a new plant for the manu ture of 60 per cent., 90 per cent. and per cent. hydrazine hydrate, and of hyd zine sulphate, hydrobromide, hydrochlor and nitrate. Hydrazine and its salts h valuable applications in the chemical allied industries owing to the powerful ducing action of hydrazine, compounds which may be used in the manufacture organic chemicals and dyestuffs, as a ducing agent for the deposition of me from solutions of their salts, and in m other ways. Information may be obtain from the company.

P.A.T.A. Year Book.—The year b and protected list, 1949-50, of the Prop tary Articles Trade Association was cently distributed to chemists and ot members of the Association. The list g the trade and retail prices (tax-inclu where applicable) of the products of manufacturer members, and the purch tax rate for each chargeable product. I 1 consists of medicinal and surgical parations, and Part 2 of toilet preparation cosmetics, foods, etc. An innovation is inclusion in the year book of a comp alphabetical list of proprietary artiprotected by the P.A.T.A., with a reference against each entry showing page on which the manufacturers' na and price of the article are to be four

Purchase-tax Changes. — The And French Drug Co., Ltd., 11 Guilf Street, London, W.C.1, state that purch tax has been reimposed on the 500-tal bottle of Hypotensyl. — The Croot Laboratories, Ltd., Park Royal, Lond

I.W.10, state that they have been sucessful in negotiations with the customs and accise authorities in securing exemption from purchase tax of winchesters of Colloone and Collotone (veterinary). — GLAXO ABORATORIES, LTD., Greenford, Middleex, announce that purchase tax has been eimposed on tablets of Ostocalcium, Caleferrum and Ostelin. The 1,000-tablet ack of each, and all packs of colloidal alcium with Ostelin, are being redesigned s tax-free dispensing packs at unchanged rices.

Price Alterations.—ARTHUR H. Cox & lo., Ltd., Lewes Road, Brighton, 7, anounce alterations in the prices of their lhestnuts.—The Crookes Laboratories, Td., Park Royal, London, N.W.10, state hat, in common with other leading manuacturers, they reduced the prices of their itamin-B₁ tablets and ampoules and of itamin-B₂ tablets on November 14. On lovember 22 price increases became effective also for the following specialities of he company:—Crookes pulv. alkalina co.; lookes stilloestrol salve, 1-02.; and lookes zinc ophthalmic, ½-02. set. Trade iscounts are unchanged. The retail prices f Neo-ferrum and Neo-ferrum with arsenic re being increased on December 12.—May lounce alterations in the prices of Uropac, Iriodone, Uriodone Forte, Vasiodone and vater-soluble contrast media, M. & B.

New Container Adopted.—Moore Mediinal Products, Ltd., 64 Gloucester Place,

W.1, as standard for their Bon-Accord, and Deedon printed screw - capped aluminium container, varying only according to size and overprinting. The new container was welcomed by visitors to the London Medical Exhibition, recently, as hygienically an vance in the presentation of the company's well-known handoperated atomisers. The container for the Brovon midget inhaler is

Oil Colour Set.—Kodak, Ltd., Wealdtone, Harrow, Middlesex, have introduced

an improved and enlarged version of the Kodak oil colour set. The set contains a wide range of highly concentrated colours that blend well together, and an instruc-

tion book giving advice on choice of colour; blending and application; the colouring of portraits and landscapes; and including a tabulated guide to the use of the colours.

Proprietary Articles Trade Association

Additions to Protected List (Part 1).—Skol Products, Ltd. (sole distributors, Scott & Bowne, Ltd.), Skol sun lotion, 12s. doz., tax 33\frac{1}{3} per cent., inclusive retail price, 1s. 10d.; 18s. doz., tax 33\frac{1}{3} per cent., i.r.p., 2s. 9d.; 3os. doz., tax 33\frac{1}{3} per cent., i.r.p., 4s. 7d. Healex antiseptic lotion, 8s. 5d. doz., tax 33\frac{1}{3} per cent., i.r.p., 1s. 2d.; 15s. doz., tax 33\frac{1}{3} per cent., i.r.p., 2s. 1d.; 24s. doz., tax 33\frac{1}{3} per cent., i.r.p., 2s. 4d. Alterations to Protected List (Part 1).

Alterations to Protected List (Part 1).

—British Felsol Co., Ltd., Felsol powders, tax-free dispensing pack (ninety powders, 11s, 3d. per box) now available. The pack may be included to qualify for bonus terms available on orders to a trade value of

22s, 6d.

Crookes Laboratories, Ltd., Lacto-calamine cream, Neo-ferrum, zinc cream. Previously tax-free dispensing packs again subject to 33\frac{1}{3} per cent. purchase tax. Crookes iodine oil (previously listed as Collosol iodine oil), 1-oz., 16s. doz., tax 33\frac{1}{3} per cent., i.r.p., 2s. 5d., 4-oz., 48s. doz., tax 33\frac{1}{3} per cent., i.r.p., 7s. 4d.; 16-oz., 144s. doz., tax 33\frac{1}{3} per cent., i.r.p., 22s.; 80-oz., 5os. each, tax 33\frac{1}{3} per cent., i.r.p., 83s. 4d. Halimalt (new size), 8-oz., 2os. doz. 2s. 6d.; 1-lb., 32s. doz., 4s. (exempt from tax).

MACHINERY, PLANT AND EQUIPMENT

Precision Labelling.—Of a number of labelling machines manufactured by Rawsons (Labelling Machines), Ltd., North Farm Road, High Brooms, Tunbridge Wells, Kent, the model most likely to interest pharmaceutical manufacturers is

possibly the Autorex Precision labeller illustrated. The model is accurate, versatile and efficient. It is suitable for ampoules, for bottles, small as well as large, plain or fancy, and it is especially serviceable for labelling panels and recesses. It has two readily interchangeable wiping movements, is quickly adjusted, portable and quiet. The model is capable of speeds up to 210 doz. containers hourly, and is adapted for continuous or single delivery. A descriptive folder is obtainable from the manufac-

Photographic Washing Apparatus. — A new Velox siphon washer, issued by Kodak, Ltd., Kingsway, London. W.C.2, is specially designed for trade developing and printing work. The washer is a compact apparatus capable of dealing efficiently with about 500 prints an hour at low water consumption (about half the amount used by normal washing methods). The unit consists of two round opal plastic bowls 15 in. in diameter and 3 in. deep, coupled together by a trough containing automatic siphon, water inlet and waste pipe. Water jets connected by rubber hose to the main supply feed the bowls. The unit is moun-

ted on a tubular stand about 5 in. high, and the whole fits easily into standard "rocker" sinks. Each bowl holds up to eighty 1-pl. prints, and washing is com-

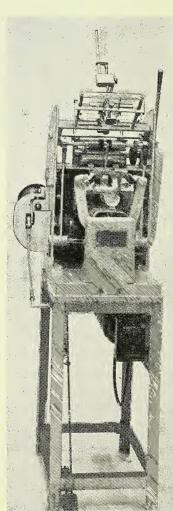

plete in about 20 min. Fine jets feed wal into the bowls and maintain agitatic When the level of the water has ris about 2 in., the automatic siphon caus it to fall rapidly to within about \{\frac{1}{2}\) in, the bottom of the bowl. The siphon th

closes automatically at the jets begin the refi ing and agitation agai The whole sequen takes about three minute

Truck for Drums. By means of a load-gri ping device, the Slingsl drum truck engages t top rim of a drui which thus pulls over (to the truck and remai securely held in a ba anced position for whee ing the drum or setting it at rest. The load-gri ping device is instant adjustable and the true has jolt-proof wheels ar a handle shaped to co form to the operator body. It is made by H. (Slingsby, Ltd., 89 King way, London, W.C.2.

Factory Powder R covery. — In factoric handling or producir finely divided powde (e.g., cosmetics) it usually necessary both t remove the dust of th product from the atmo phere and to reclaim to avoid loss. This ma be done by a system (be done by a s,"
" air conveying," (
" Vokes, Ltd Guildford, Surrey, ar exponents. The Voke dust-recovery filter unit have cubic - foot - per minute capacities over wide range according t the nature of the produc and factory, from small units with hand operated cleaning me chanism and a capacit up to 250, to plant

with internal walkways and capacities of 2,000 c.f.m. The filter-bag frames are of double-crimped wire mesh with convesides (to ensure that the bag is taut).

Fully Automatic abelling Machine.
-D. Trapow & o., Ltd., 113 egent's P a r k oad, London, W.I, have deveped a new fully tomatic labelling achine, capable

handling vials, ampoules and her small cylindrical objects. The achine affixes labels completely

ound containers, or the ends of the labels ay be overlapped, according to size of bel and container. The ampoules are fed to the machine from an inclined hopper, om which they are delivered to the labeling position along an inclined plane. After elabel has been transferred from the implate to the container, it is pressed to elatter by rolling it along a sponge bber pad, the bottles being rotated by a lt. The containers are finally unloaded om the machine at a speed of up to 200 z. hourly.

Removal of Atmospheric Impurities. he Hymatic Engineering Co., Ltd., Redtch, Worcs, have evolved a high-preci-

on air rectifier and reducing-valve unit lat delivers dry, clean air at any desired ressure. In the Hymatic air-rectifier the igh-pressure supply air is introduced at igh velocity through a specially designed rifice, mechanical separation of the imurities being effected centrifugally by a ownward rotating spiral motion. There is second stage of purification by an upard passage at reduced velocity through "scrubbing" medium. The company lso manufacture mobile compressor sets or insecticide spraying outfits (as illustated above).

THE CHEMIST AND DRUGGIST

Removal of Vapour from Gases.—Designed for "solid absorption of water vapour from gases," the Birlec Lectrodryer, manufactured by Birlec, Ltd., Tyburn Road, Erdington, Birmingham, 24, traps the moisture on the extensive surface of a specially prepared porous, granular, activated alumina, the important characteristic of which is its ability to give off its adsorbed water under heat without itself suffering any change: A range of models has been designed to meet varying needs.

Electric Still.—Runbaken Electrical Products (Electrical & Auto Products (1931), Ltd.), 71 Oxford Street, Manchester, are the makers of the Autostil

electric water distiller, an apparatus 45 in. high and 17 in. in diameter, and requiring a floor space of 1½ sq. ft., for distilling water independent of connection to water mains for flow or cooling. The Autostil operates

by charging with water and switching on the current. (If, for any reason, the water supply is not replenished, the machine switches itself off.)

UNIVERSITIES AND INDUSTRY CONFER

RECENTLY a first conference of leading representatives of all British universities and of industry was convened by the Federation of British Industries, through its education and industrial-research committees. About 130 delegates and guests met near Leamington Spa, and the discussions covered a wide range of subjects, including industry's requirements of scientists and technologists, their education and training, and the extent to which industry can employ arts graduates. Methods of selecting arts graduates for entry into industry, and their subsequent training, were examined. Attention was drawn by many speakers to the present serious shortage of science teachers for schools, and it was pointed out that this constituted a possible threat to the continued supply of sciencestudents to the universities.

Developing Contacts

Other subjects dealt with included the extent to which education for management is desirable in the universities, the uses to which vacation courses can be put, postgraduate courses for men proposing to enter industry, and various means of developing closer contacts between industry and the universities. Industry was asked to supply the University Appointment Boards with fuller information on opportunities for careers in individual industries and firms, and on the need for different types of graduates.

In an analysis of replies to a questionnaire on the use by industry of university graduates, the Federation states that the twelve-point questionnaire asked for sta-tistics and comments from firms on their experience in the employment of university graduates. Forty-three replies contained comments and full statistics. further ten commented on special points. Eight replies gave reasons why university graduates were not employed by the correspondents. In general, graduates are required by firms for research, process and production control, quality control, process development, product design, various aspects of engineering, including technical and maintenance, and as experts such as chemists, metallurgists and various kinds of technologists. On the non-technical side they are required for market research, sales, secretarial, statistical and legal work, and for the production of literature. Numbers are recruited as management trainees

(i.e., they are engaged because they thought suitable for the firm and afte period of training are employed as as tants and subsequently managers in particular section of the company which they show greatest aptitude). appreciable number attain executive or ministrative positions but, as a rule, t are not recruited for such positions dir The great majority of firms that repl have training schemes, some of which informal. All but three of the firms plying gave an unqualified "yes" to question "Are avenues open for the l of the graduates you employ to reach highest positions?" The three concerns the minority said that they recruited gr uates for scientific and technical positionly and regarded them as engaged specialists.

A number of firms commented that industry the number of high positions av able is few. Only exceptional persons hope to attain them, and there is sev competition between graduates and th who have entered the firm at a junior : and gained experience by "going throu the mill." The replies received indica that the period of training of gradua after recruitment varied between months and five years, according to nature of the company's business and department or position for which the gra uate was being trained. The average peri of time appeared to be fifteen-eighte months.

Opportunities for Arts Graduates

Opportunities for arts graduates we thought to exist in the sales, secretari publicity, commercial, educational and pe sonnel departments, many of which "shou eventually lead to positions involving ma agement responsibility." Entrants mu therefore regard themselves as traine "An arts man who goes in for an industri career should only do so because it his aim, because he feels himself bett equipped as a result of his university e perience." Several firms replied that pe haps the ideal arrangement was for an ar man subsequently to study some other tecl nical subject, "but in practice life is to short." All who commented on the grad uate who had had war-time Forces' e perience were unanimous in their approve of him. More thought military service should precede university studies.

EVIEW OF ATOMIC ENERGY

T a meeting of the Glasgow and Southestern Scottish Branch of the Pharmaceucal Society on November 30, Mr. S. lughan in the chair, Mr. A. T. DALZIEL ave an address entitled "The Atom and its eservoirs of Energy."

nergy "Shells"

MR. DALZIEL in his review went back to 780, when the first table of elements was ompiled. He illustrated by diagrams the ructure of the atomic pile. In the atom, e said, electrons were going round a cen-al nucleus but confined to certain energy shells." Each shell could take only its roper quanta of electrons. The seventh nell was unstable and in all normal chemial reactions the sixth was the last to hold bgether on earth. In the spectroscopic tudy of the stars it was possible to go far eyond the sixth shell: thirty-one energy evels had been recognised. The speaker aid stress on the enormous energy freed rom the atomic pile, and said the power rom the fission of 1 lb. of plutonium would ive the same amount of energy as 5.950 ons of coal. The atomic bomb dropped t Hiroshima had killed 50 per cent. of he population within a radius of four to ight miles of the explosion. Many of those eople suffered no mechanical damage yet lied of anæmia as a result of gamma rays ttacking the marrow in their bones.

There were many difficulties hindering he use of atomic power for power stations. One was the cooling system. The water hat must be used for the purpose could not be conveyed to the sea after use because of its contamination, nor could it be used more than once or decontaminated ast enough. The atomic pile was now creating radioactive isotopes. Isotope 25 of sulphur was valuable in medicine, and atomic scientists were being asked to produce it in greater quantities. If atomic power were rightly used, great benefits would be made available to mankind.

The Chairman expressed the appreciation of members for Mr. Dalziel's lecture, which had been, he said, of interest to them all. Mr. Holm (vice-chairman) proposed votes of thanks to speaker and chairman.

The Secretary (Mr. A. Officer) read correspondence regarding the Thomas Guthrie bequest of £100 to the Branch, and it was unanimously decided that that sum should be added to the Branch prize fund.

CHEMOTHERAPY IN MALIGNANT DISEASE

REVIEWING chemotherapeutic means of attacking cancer, Dodds ("British Medical Journal," November 26, p. 1191) classifies the active substances into (a) those that affect the host background so that the growth of the malignant tumour is suppressed or held in abeyance (such as the œstrogens), and (b) cytotoxic compounds that act preferentially on the cancer cells as compared with the host. Important compounds in the second class are urethane and nitrogen mustards. Chemical research has produced modified folic acids, including aminopterin, which possesses powerful anti-folic-acid activity. The substances interfere with the multiplication of cells and have been found of use in the treatment of a number of transplanted tumours. They have also been used in the treatment of human malignant disease, particularly leucæmias. The author warns that cytotoxic compounds are extremely toxic and that their use in the human subject is fraught with danger. Cade (ibid., 1103) concludes, from an examination of a number of cases, that the late stages of cancer of the breast can be influenced by sex hormones, usually favourably, though occasionally the compounds aggravate the condition.

NEW BOOKS

Review of Pharmacy.—George Fiero, 8\frac{3}{4} \times 6 in. Pp. 121. 18s. Chapman & Hall, Ltd., 37 Essex Street, London, W.C.2. In a series of tabulations the author condenses, primarily for pharmacy college graduates of the United States, information about the drugs, chemicals and preparations of the U.S.P. and (U.S.) National Formulary. The present (sixth) edition conforms with the English titles used in those publications.

Physique of Young Adult Males.—W. J. Martin. 9½ in. x 6 in., pp. 66, 1s. 3d., H.M. Stationery Office, Kingsway, London, W.C.2. The Memorandum (No. 20 in a series prepared by the Medical Research Council) is based on a statistical analysis of the records of the first medical examination of some 90,000 recruits between the ages of twenty and twenty-one who were called up in the months before the outbreak of the 1000-45 war. It contains information on their physical measurements, medical fitness and evesight.

OL. CLII DECEMBER 10, 1949 No. 3642

Medical Men and Dispensing Tests

T is encouraging to see from a letter and in editorial article in the "British Medi-Journal," December 'Catching the Chemist," that doctors have aken up the cudgels against a provision ncorporated in the National Health Service (and inherited from the National Health Insurance) which many pharmacists regard as professionally unwarranted. The provision is the official testing of N.H.S. dispensing by resort to subterfuge. writer of the letter has declined to provide nis local Executive Council with "three prescriptions for imaginary patients," for testing the "dispensing powers of the local chemists." He felt the practice was "undesirable and unethical" and had never wished to be a "snooper." "What is my friend the chemist to think of me," he asks, "if, having dispensed an apparently genuine prescription signed by me, he finds it is all a trap to catch him out? I'm afraid I value his opinion too much."

Executive Councils are required under Regulation 26 of the General Medical and Pharmaceutical Services Regulations, 1948, to test drugs and appliances after consulting with the Local Pharmaceutical Committee. It is probable, as the B.M.J. points out, that most Councils adopt the model scheme prepared by the Ministry whereby the test prescription, written by a doctor on the Council's list, is handed to an "agent of the Council," who presents it to a chemist (the name of the chemist is not disclosed to the doctor) for dispens-

ing. After it has been dispensed the agent reveals the true purpose of the prescription. The B.M.J. doubts the validity of a procedure, put forward, perhaps, to protect the public from abuse, that compels doctors to "collaborate with agents" and to "consort with imaginary patients," while bringing honour to no one concerned.

Chemists have no call to shrink from the testing of their dispensing, but they may understandably take the institution of a test as a slur upon their professional ability—a slur no employer would inflict on any responsible employee if he wished to obtain his best co-operation.

Although the test prescriptions are usually set with care, and with the safeguard of the Local Pharmaceutical Committee's co-operation, it is possible that, at least in the case of pharmacists who react badly to the atmosphere of an examination room, the efficiency of the dispensing service may be impaired by the existence of tests, particularly when those pharmacists must suspect any patient not known to them as a possible "agent."

The Ministry may claim that, as it is buying some £21 millions' worth of medicines per annum it must have some check (apart from statutory pharmaceutical qualifications) on the quality of those medicines. But to be consistent it should test the services of other contractors, including the dispensing of doctors, which might conceivably involve an agent posing as a patient to a rural dispensing-doctor. Any move in this direction, as the "British Medical Journal" rightly points out, would be intolerable to members of the medical profession.

The removal of subterfuge from testing would result in increased goodwill of the pharmaceutical and medical professions. As it would be difficult to apply a test without subterfuge (although the B.M.J. suggests that the agent could select one of the made-up and "waiting" medicines), another advantage resulting from this removal might prove to be a financial saving equal to the cost of the agents' and analysts' fees. Even the relaxation of test prescriptions might be worth trying, at least for an adequate experimental period.

The Doctor's Discretion

THE resurgence of peace has been followed by abandonment of war-time expedients in medicine. The issue of a new British Pharmacopæia in 1948, followed by the publication of the National Formulary and British Pharmaceutical Codex in 1949, should usher in an era of stabilisation in the pharmaceutical preparations subject to official standards. The time has come when the interests of the expanding health service will best be served by allowing prescribers to become fully acquainted with the medicaments at their disposal, and by avoiding trivial modifications in established formulas. Compilers of dispensatories are apt to overlook the fact that the general medical practitioner continues to prescribe a medicine by the name to which he is accustomed irrespective of changes in composition (of which he may not even be aware). Those changes may involve a deplorable deterioration in therapeutic values, as the example of "mist. expect." may illustrate:-

MICTIDA EXPECTORANG

WISTURA EXPECTORANS				
			N.W.F.	N.F.
		1941-3		1949
Ammon. carb	gr. 3	gr. 3	gr. 3‡	gr. 3
Tinct. ipecac				m. 10
Tinct, opii camph.		m. 2 †	m. 15	****
Ext. glycyrr. liq			m. 10	m. 10
Aq. ad fl. oz	$\frac{1}{2}$	$\frac{1}{2}$	1/2	1/2

*Liquid ext .- m. 10 tinct. †Conc .- 16 tinct. ‡Bicarb.

The sequence from the "mist. expect." of 1933 is towards "rationalising" the title in the National War Formularies of 1941 and 1943 into "mistura ammoniæ et ipecacuanhæ composita," with "mistura expectorans" and "mistura tussis" as synonyms. From 1941 to 1947 the therapeutic value is retained (and slightly increased) by use of concentrates as a war economy. In 1947, the alternative synonym (mistura tussis) is dropped, with reversion to tincture of ipecacuanha and paregoric in full strength. Improvements comprise adding liquorice (to give body and flavour) and using ammonium bicarbonate (to ensure ammonia content). The N.F., 1949, omits synonyms and leaves out the camphorated tincture of opium, but includes anise water and camphor water to simulate the flavour thereof. A notice appended to the formula states t "When mistura expectorans is prescrib mistura ammoniæ et ipecacuanhæ shall dispensed." Thus the popular cough m ture has retrogressed to the deceptive "s paregoric" category, presumably to sati some anti-opium prejudice. The 1932 B adopted "tinctura opii camphorata" the official title for paregoric (relegati "tinctura camphoræ composita" to t status of a synonym) in a zealous endeavo to emphasise its opiate character. Nev theless "tinct. camph. co." persists in p scriptions. Attempts at dictating t names and nature of remedies only defe themselves. It is as easy to write "mi sedativa" as "mist. expectorans" a doing so results in more than double t dose of morphine. "Mist, tussi rub." in 1949, no longer recognised as a standa formula or synonym, owing to its undu pleasant taste and appearance. Neverth less, physicians continue to prescribe it such, or alternatively to replace it by t even more palatable and potent proprieta equivalents.

Our contention is that the time has a rived when the right of the doctor to gi opiates must be recognised as a matter f the exercise of his own discretion in the interests of his patient. The Secretar General of the United Nations has state (see p. 802) that narcotics are indisper sable to modern medicine and bring a grebenefit to mankind when used to allevia pain and restore health.

A PHARMACIST'S **ANTHOLOGY**

In 1895, wearing a smart frock-coat an an even smarter puce cravat, Manse Roberts opened his chemist's shop at th base of an arboreal North London hi intersected with rows of solid new villa: The wholesome breezes of Hampstea Heath blew down over the hill before los ing themselves with a different odour i the clotted lower-class districts far below Among tasteful scrolls heading the new chemist's bills—and much more imposin than the actual premises—was an engrav ing depicting the shop's exterior with two smart carriages drawn up at the kerb From "The Dark Daughters," by Rhy

Davies.

PUBLIC PHARMACISTS' SPECIAL MEETING

SPECIAL general meeting of the Guild Public Pharmacists was held in London December 3, Mr. D. H. S. Cox (presint) in the chair. The meeting had been lled at the request of twenty members, consider the salary award of the Indusial Court (Hospital Pharmacists' Salary ales—Claim for Increase) and the imications of the "Hospital Pharmacists' alary Scales for New Entrants"; and to rmulate and vote upon a motion reflecting the opinions expressed by members resent at the meeting.

hy Meeting was Called

The case for calling the meeting was ply stated by one of the signatories to be request. The age linkage to twenty-tree for new entrants was one of the rincipal points causing concern, and the pinion was expressed that, at a time when the need for attracting young men into the hospital pharmaceutical service was uost desirable, that point alone would tend to reduce the flow of entrants so essential maintain the efficiency of the pharmaceutical service.

The chairman of Committee C outlined ie course of the negotiations leading up the decision to take the matter to the ndustrial Court, and indicated subsequent rogress and the reasons for accepting, mong other things, the age linkage. In ne course of his statement he effectively the criticism that members were not ept informed of the progress of the negoations, and emphasised that it was not ossible to publish detailed information in ne pharmaceutical Press during the course f negotiations without grave prejudice to heir success. As much as possible had een done to inform the membership by istrict members and members of council ddressing meetings of the branches. As such detailed information as it was posble to give (at a time when it is confiently expected that an interim salary cale will be finally negotiated in the imnediate future) was imparted to the neeting. There followed a full and free iscussion covering all the chief causes of issatisfaction which, it was generally ad-nitted, were inherent in the way in which he management side insisted upon their iews and their interpretation of the Indusrial Court Award. The following motion vas then formulated, read to the meeting n behalf of those members who signed he request, and seconded:

"That the Guild's representatives on Committee C of the Pharmaceutical Whitley Council be instructed that the Salary Scales of New Entrants, Hospital Pharmacists, tied to any age, are not in accordance with the award of the Industrial Court and are therefore not acceptable to this general meeting of the Guild of Public Pharmacists."

The amendment which follows was then

proposed and seconded:

"That this meeting, recognising that the results of the negotiations are a great disappointment to the members of the Guild and a grave reflection of the attitude of the management side of Committee C in their approach to the pharmaceutical profession in the Hospital Service (particularly the linkage of the award to age and the points scheme), expresses its confidence in the efforts of the Council and its negotiators."

During the subsequent discussion on the motion, it was pointed out that, in the original motion, only one objection had been singled out for particular mention, whereas the amendment brought out that grave dissatisfaction existed with other aspects of the scales, such as the points scheme for grading, with its unfair discrimination against mental and other special hospital pharmacists. When put to the vote, the amendment was carried by a substantial majority.

Closing the meeting, the chairman expressed his satisfaction at seeing so many members from all over the country, in-

cluding Scotland.

Applied Medicine.—The other day the gas inspector visited my house. He was carrying the four feet of iron pipe with a small wooden disc at one end which is traditionally strapped to the crossbar of the inspector's bicycle, but this man came on foot. I don't think he knew I was a doctor, for I have no plate up and I was wearing my second best. On my asking what was the weapon he was carrying he master was the weapon he was carrying he paused to build up an atmosphere of mystery and then said with lowered voice, "It's a stethoscope!" I registered appropriate awe and asked what he heard with it, secretly hoping for some lurid description of subterranean bronchi. He replied, with commendable frankness, "Not much. But you sometimes 'ear a sort o' squeakin' if the main's broke." I sympathised. - A peripatetic correspondent in the "Lancet."

POISONS LAW, 1935-49

19. The Need for Co-ordination

Poisons law is unduly affected (and afflicted) by lack of co-ordination between the authorities responsible for legal requirements and other bodies concerned in their application. The original intention of the Home Office in making alterations in the Poisons List and Rules on the recommendation of the Poisons Board was set aside by war emergencies, and the Board lapsed into an obscurity from which it has hardly yet emerged. Publication of the Poisons Rules, 1949, performed a valuable service in consolidating and co-ordinating the many amendments to the 1935 Poisons Rules. Nevertheless, much remains to be done in clarifying the position under the Dangerous Drugs Acts, and putting a period to the changes in status and standards of statutory poisons.

Rationalisation Moves

Endeavours to "rationalise" poisons nomenclature have so far been singularly unsuccessful, both internationally and domestically. Again, B.P. and B.P.C. changes are apt to conflict with existing provisions and create extraneous problems (of composition and character) in the absence in advance of due notice of official alterations. Extraneous considerations affect poisons law to an extent requiring closer attention and better co-operation between the competent authorities, as is made evident below.

International synonyms have signally failed to secure the implied uniformity. Thus, Fowler's Solution of 1786 was an imitation of the celebrated remedy "Patent Ague Drops." Tinct, lavand, co. was added so that the colour and taste would prevent patients inferring that it could be taken freely, and this was adopted as "Liquor Arsenicalis" in the British Pharmacopæias of 1867, 1885, 1898 and 1914. Under the International Agreement of 1930, "Solution arsenicalis seu Fowleri" was designated a neutral solution with a standard of 1 per cent, of arsenious anhydride (arsenic trioxide). The present position is as follows:—

Solutio Arsenicalis Seu Fowleri Liquor arsenicalis, B.P., 1 per cent.—Neutral and colourless.

Liquor potassii arsenitis, U.S.P., 1 per cent. —Alkaline and colourless.

Soluté d'arsenite de potassium, French Codex, 1 per cent.—Alkaline and flavoured.

Thus there are internationally three of ferent types of "Fowler's Solution." To riginal (coloured) product can still be tained as liquor arseni alkalinus, B.P. 1934 (it is omitted from the 1949 Code

Diamorphine Linetus

Linctus diamorphini is another exam of international agreement resulting in conflicting and confusing changes. The recomendation at the 1931 Geneva Conferer to restrict the use of diacetylmorphi "with a view to its eventual abolition resulted in its prohibition in some (countries (C. & D., September 3, p. 31 but had relatively little effect on its legimate use for alleviating pain and troub some cough in this country. The fuently prescribed "Linct. diamorp N.W.F." disappeared from the 1949 N.1 and the gap was filled by the 1949 Cod formula, which was given official (pre-pulication) status by Press notice. Thus depensing chemists have to differentiate between:—

ween:—
Linct. diamorph., N.W.F. (well know to prescribers; formerly in Drug Tariff Linct. diamorph., B.P.C., 1934 (r named linct. diamorph. et hyoscy B.P.C., 1949, not in Drug Tariff); and Linct. diamorph., B.P.C., 1949 (ne and virtually unknown formula, offici in Drug Tariff of May 1949, for months before the B.P.C. was available

Adopted Without Notification

Among the obscurities of poisons lay none is greater than that of according off cial status otherwise than through the "central" (Home) office—unless, as wit phenadoxone, it is adopting a name with out any notification. An organisation for co-ordinating poisons law is already it existence and should be applied in controlling extraneous activities of the other bodies having direct connection therewith viz.:—

Home Office: Drugs Department
International (D.D.) Conventions
U.N. Economic and Social Council (General supervision)

World Health Organisation (Definition of drugs")

Supervisory Body (Estimates and sanctions)

Permanent Central (Opium) Board (Statis tics of production and consumption)

HOME OFFICE: POISONS BOARD Domestic Poisons Law armaceutical Society

neral Medical Council

nistry of Health (Drug tariff) ernational Pharmacopæia (adoption op-

Restriction is the operative condition in sons law, and this tends to an unbalanced itude. In particular, dispensing chets may come to feel that narcotics are amned" as well as "dangerous," and t their use in medicine is merely a matof sufferance pending the discovery of cotics free from habit-forming tendens. A new era in international poisons v is ushered in by the publication by the ited Nations of a "Bulletin of Narco-' A statement by the Secretary-Genl, providing a preface to issue No. 1 ctober 1949), states:-

In themselves, narcotic drugs are neiher dangerous nor harmful. Indispensable to modern medicine, they are used the world over to alleviate pain and restore health. Thus used they are a great

But abused they benefit to mankind. cause havoc and misery. The social dangers of drug addiction are well known ... The international control and the treaties on which it is based have, however, a wider significance than the limited field of narcotic drugs. If the principles on which these treaties and this control rest could be applied with equal success to wider fields of human endeayour, to other kinds of dangerous wea-

pons, peace would be within our reach.
The Bulletin initially outlines the present system of international control and adds that the task of elaborating a single international convention (to replace eight existing international instruments) is complex and difficult task." It is to be hoped that such co-ordination of effort will be extended to domestic law. In the meantime, it is encouraging to note that recognition is accorded to the beneficial aspects of narcotics and that in the future pharmacists may be treated more as indispensable distributors rather than as potential criminals.

HEAT INSULATORS FOR CHEMICAL PLANT

DST heat insulating materials possess a l-like structure, which traps air, and ereby resists heat exchange. Of the nurous new products that have been in-duced for heat insulating in the chemiand allied industries attention was wn immediately prior to the war to miculite, a waste product of South rican mines, which could be caused to ell to give a cellular structure by applition of heat. Kieselguhr continues to It is supplied loose in much used. cks and is prepared for applying as inlation on hot pipes by stirring (after the dition of binders) into a stiff paste with When the water has evaporated, spaces are left, and by the action of e binding compositions, a firm product sults on drying. The insulating propers of magnesia practically equal those of selguhr, but furnace slag insulating prerations are much heavier.

ternative Materials

For the production of chemicals, prered kieselguhr has the advantage of retance to acids, steam, etc., the action of nich tends to cause a number of altertive materials to disintegrate when high mperatures are reached. Where the temratures do not exceed 300° C, advantage is taken of the less expensive magnesia preparations produced as shaped pieces. Cellular-concrete, a preparation in which small pores have been formed by a swelling process, is a development of this.

To assist the plant designer, insulation is prepared in the form of plaits and mats, which combine the advantages of sectional coverings with those of the plastic mass. They mainly comprise a hose of jute or asbestos, filled with the insulating material, such as kieselguhr, granulated expanded cork, silicate cotton, silk, and asbestos fibre. Pads made of slag-wool, asbestos, and silicate cotton are convenient for use in parts which have to be repeatedly removed and replaced, and which must always be readily accessible. This type of insulation is particularly useful for riveted seams of plant, valves, and flanges, etc. Packed insulation built for resistance to chemical action and mechanical strains utilises a hard outer casing, or sheet-metal jacket, within which the slag-wool, silicate cotton, or kieselguhr are packed.

Cork-stone possesses great durability and mechanical strength but cannot easily be used for complicated shapes. During the expansion process most of the volatile constituents of the cork are removed in a

vacuum treatment.-A. G. A.

MEDICAL ABSTRACTS

Methyl n-Propyl Ether in Anæsthesia.
—Sykes ("British Medical Journal," August 20, p. 420) describes the use of methyl n-propyl ether as an inhalational anæsthetic in twenty cases. Points of interest were lack of irritation of the respiratory tract and the small percentage of post-operative pulmonary and gastric complications. The compound, which is also known as Metopryl, is a clear, colourless, volatile liquid with a characteristic odour. It has the formula CH₄.CH₂.CH₂.O.CH₃.

Dyspnœa in Coal-miners. — Assuming that dyspnæa in the earliest stages of pneumoconiosis might be due to bronchospasms associated with focal emphysema, Robertson ("British Medical Journal," October 29, p. 961) administered iso-propyl nor adrenaline (Neo-Epinine) to fiftyeight colliers who complained of breathless-Inert tablets were given for one week followed by tablets (identical in appearance) containing 20 mgm, of the drug for four weeks. Little or no difference was found in the vital-capacity estimations with the inert tablets, but after four weeks of the drug, forty-four men felt "improvement" while under treatment.

Antihistamines in the Vomiting of Pregnancy.—Dougray ("British Medical Journal," November 12, p. 1081) suggests that the use of Anthisan and Phenergan may provide a simple and safe method of alleviating cases of nausea and vomiting of pregnancy that do not respond to dietary measures. Anthisan was given in doses from 0.1 gm. twice increased to six times daily, and Phenergan in doses of 0.025 gm, thrice daily. It was usually found possible to discontinue the drug after three or four weeks. The chief side effect noted with both drugs was drowsiness, and that, where marked, was successfully relieved by the administration of 0.5 mgm, amphetamine sulphate.

Vitamin B₁₂ in Anæmia.—Spies and colleagues ("Lancet," September 10, p. 454) found, in forty-nine cases (including pernicious microcytic anæmias and tropical and non-tropical sprues) treated with vitamin B₁₂ orally and parenterally, that minimum, maximum and optimum doses varied from patient to patient and from time to time in the same patient. The vitamin is 30 to 60 times more efficacious, weight for weight, parenterally than orally. No patient was found allergic to vitamin

B₁₂ or to refined concentrates of it. S cases of macrocytic anæmia with meg blastic arrest of the bone marrow did respond to liver extract, folic acid or min B₁₂ orally or parenterally.

Winter Care of the Skin.—For an i able, dry and sore skin in winter, Bo ("Practitioner," 1948.II.461) suggests ointment such as the following:

R Wool alcohols 60
Hard paraffin 170
Soft paraffin 170
Liquid paraffin 600

The preparation may be used as a hydrocream formed by mixing with the cintra an equal part of distilled water. Oil water emulsions, such as the base for position cream, had a drying effect on exutive skin conditions. For those conditi "old-fashioned pastes" were valuable, a paste made to the following form spread on soft cotton is suggested:—R Ointment of zinc oxide

Ointment of zinc oleate

Zinc oxide and starch powder a.a. 60
Liquid paraffin 60 n
White soft paraffin to 1 our
The skin should be cleansed with oil.

New Drug for Parkinsonism.—A r synthetic drug, trihexyphenidyl, 3piperidyl) - 1 - phenyl - 1 - cyclohexyl propanol hydrochloride, known also Artane, has been found by Doshay a Constable ("Journal of the Americ Medical Association," August 27, p. 13 to be a valuable addition to the dri already in use for the treatment of Park sonism. In a series of 117 patients treal with this drug for periods ranging fr six months to two years the condition 76 per cent. improved. Post-encephali parkinsonism required larger doses th arteriosclerotic or idiopathic forms the disease. One or two mgm. twice da (if necessary increasing to three or fo times daily) was recommended in m or moderately advanced cases. phenidyl although having properties sembling atropine was found to be virt ally non-toxic and well-tolerated. K. Coubin (ibid., October 8, p. 3770) h treated 104 patients suffering from pa kinsonism and related conditions. Mo than half of the patients had received the drug for more than six months and me appeared to derive sufficient benefit justify continuing the treatment. Unplea ant effects were noticed occasionally b forty-one patients.

A FORGOTTEN PERIODICAL

By Adest

TENTURES in journalism planned for pharmacists and their associated wholesale houses have sometimes pharmacists and tained only a limited success, as an ticle in THE CHEMIST AND DRUGGIST of ugust 24, 1946 showed. A now forgotten ample began publication in September 374 and ended with its thirteenth monthly sue in October 1875. Its title was:

"The Medico-Pharmaceutical Abstract and Review: A high-class Journal Devoted to the interests of Medical men and Pharmacists, designed to bring the two important bodies into closer union, and supported by the leading Members of both Professions."

he first number contained thirty-two uarto pages, of which fourteen were allotd to advertisements. The price was sixence. A prospectus accompanying the dvertisement tariff stated: "The Projectors f the new Journal are fully aware of the rduousness and far-reaching responsibility f the work they have undertaken; but . . . aving secured the sanction or services of he most distinguished representatives of nedicine and pharmacy, they enter upon it it it full confidence." Orders were to be ddressed to Mr. Cyrus Buott, 4 Belgrave treet, London, W.C. Presumably he was he Mr. Buott who was registrar of the Inited Society of Chemists and Druggists luring the negotiations that led to the passing of the Pharmacy Act of 1868. He vas untiring in his efforts to organise the hemists and druggists of the country when t was thought that they were being ignored by the Legislature, and in 1868 he was presented with a testimonial. (Incidentally, he number of chemists and druggists in he country in 1863 was estimated at 35,000 (C. & D., 1863.110): the estimate seems to be too high.)

A Miscellany

The first number began with an account, occupying about two columns, of the meeting of the British Pharmaceutical Conference held in London during the preceding month under the presidency of Mr. T. B. Groves. Shorter notices of the annual meetings of the British Medical Association and the British Association for the Advancement of Science came next. Passages from an address delivered at the American College of Pharmacy followed. There were

pharmaceutical, chemical and therapeutical abstracts. An account of Joseph Priestley was given, apropos of a commemoration in the United States. Under the heading "Literary," a Mr. A. E. Barr contributed some remarks on poppies. An anonymous article on artificial teeth filled three columns. News paragraphs were comprised in a "General Summary of the Month"; one of them was devoted to a spiritualist séance. In later issues of the periodical I have found references of varying length to water plants, population statistics, lead in beverages, an international pharmacopœia, arsenical wallpaper, and "sentimental botany." Excerpts from CHEMIST AND DRUGGIST and other journals are numerous; and "a hearty word of commendation" is bestowed on the 1875 C. & D. Diary. Rather surprisingly, an abstract of the Registrar-General's report for England and Wales for the year 1873 contains no mention of poisonings, though in fact those of interest to the trade numbered 325.

"Co-operative Dispensaries"

The second number, with which was incorporated Vol. VI, No. 9 of "The Chemists' and Druggists' Advocate" (a publication that I have been unable to trace), had a notice, taken from "The Times," of an interesting experiment with a system called "co-operative dispensaries." It appeared that the combined area of Manchester and Salford was to be divided into six districts, with a public dispensary in each. Every person joining the roll of subscribers was to pay a penny a week for medical attendance and medicine, with an entrance fee of sixpence. The entrance fee for a family was 1s.; a child under thirteen years of age was to be charged not more than twopence weekly. Special fees for confinements and for persons suffering from illness when applying were listed. A "properly qualified" dentist and hospital treatment were available.

Each of the last three issues of "The Medico-Pharmaceutical Abstract and Review" contained a reminder that several subscriptions ("an unusual number" was the phrase) were overdue. In retrospect it is easy to see that it was handicapped from the outset by a preponderance of

abstracts.

MISCELLANEOUS INQUIRIES

Pharmacists in South Africa.— M. D. S.—In July 1949 there were 2,068 registered chemists and druggists in South Africa.

Control of Poultry Coryza.—S. D. E.—Spraying the birds at night with a weak solution of formalin helps to retard the spread of infection of poultry coryza.

Sodium Chlorate as Weed-killer.—

J. M. W. L.—Sodium chlorate used as a weed-killer may be applied preferably as a solution at a strength of \(\frac{1}{4} \) to 1-lb. to one gallon of water.

Thief-detecting Powder.—S. M. R.—Powders that have been successfully used for dusting coins in detecting pilferers include fluorescein and eosin. Both preparations give a vivid stain immediately the hands are washed.

Cause of Violet Root Rot.—S. N. W.—Violet root rot, a disease that attacks many plants including sugar and garden beets, mangold, carrot, swede, turnip, parsnip, beans, lucerne, clover, chicory, asparagus, seakale, celery, and rhubarb, is caused by a soil-inhabiting fungus, Helicobasidium purpureum Pat.

Silver Solder.—Two formulas for silver solder are:—

G.1		I		
Silver	• • •			 19
Copper Brass	• • •	• • •	• • •	 I
brass	•••		• • •	 2
0		H		
Copper Silver	• • •		• • • •	 13
Suver				 II

"Magic Flash" Paper.—M. I.—To prepare "magic flash" paper of the kind that appears to burn with an instantaneous flash when ignited, an unsized paper is treated for ten minutes in a mixture of four parts sulphuric acid and five parts nitric acid, washed free of acid, and dried by gentle heat. Care should be used in handling the preparation.

Red Spider in Glass-houses.—L. B.— To exclude the red spider mite (Tetrany-chus telarius, L.) from glass-houses, azobenzene, used as an ærosol (5-6 gm. per 1,000 cu. ft.), has been found to give satisfactory results. Azobenzene smoke generators are also used. The insecticide should be used while the foliage is dry and, if possible, a period of a few days should be left before the next overhead watering. Derris sprays are also effective. Arquebusade Water.—R. & H.variety of formulas are on record for
preparation. The following is typical
Oil of wormwood ...
Oil of lavender
Oil of thyme
Oil of peppermint ...
Oil of rosemary

Warm water 40 fl. oz Strain through cotton wool.

Preventing Windows from Steaming, G. P. P.—Various mixtures of soap a glycerin are used for preventing the condensation of moisture on windows, thin film of soap left behind preventing for a time at least, the condensation moisture. A typical formula is the following, taken from "Pharmaceutical Formulas," Vol. II:—

las,' Vol. II:—
Yellow soap
Glycerin 2
Hot water 12
Mix the cut-up soap with the water un
a cream results, then add the glycerin.

After-shave Lotions. — C. M. — Cle after-shave lotions may be made to the following formulas:—

Zinc phenolsulphonate ... 2
Zinc sulphate ... 0.1
Water ... 90
Zinc phenolsulphate is astringent and ant septic and similar to zinc sulphate excep

Lactic acid I Water 99 Preservative 9.5

that its antiseptic action is a little stronge

Hair-wave Capsules.—B. & B.—Th following formula gives a preparation suit able for packing in gelatin capsules, which on dissolving in water, produce a hair waving solution:—

 aving solution:—
 15

 Gum acacia
 15

 Gum tragacanth
 10

 Borax
 20

 Sodium sulphite
 10

 Boric acid
 45

 Perfume
 0.8

The solution is combed into the hair, which is then allowed to dry without further treatment. Each capsule to contain at least 2 gm. pro dosis. That amount to be dissolved in a small cupful of hot water.

GUIDE TO NEW MEDICAMENTS

formation about new proprietary medicaments to be supplied principally on prescripns. Editorial recommendation is not implied. Reprints obtainable on application.

CRYSTALLINE PENICILLIN G EYE OINTMENT

ANUFACTURER: Glaxo Laboratories, Ltd., Greenford, Middlesex.

SCRIPTION: An eye ointment containing in each gm. 25,000 units crystalline peni-

DICATIONS: Penicillin-sensitive infections of the eye where a high initial concentration is desirable; and intensive treatment of superficial skin diseases due to penicillinsensitive organisms.

bw Supplied: 1-drachm tubes.

ANTABUS

ANUFACTURER: A. S. Medicinalco, Copenhagen (Agents: Roberts & Co., 76 New Bond Street, London, W.1).

ESCRIPTION: Tetra-ethyl-thiuram-disulphide.

DICATIONS: Alcoholism.

EFERENCES IN THE MEDICAL PRESS: "Lancet," 1948.2.1001.

DSAGE: ½-1½ tablets daily, under medical supervision.

ow Supplied: Packs of fifty tablets each containing 0.5 gm.

EULISSIN

[ANUFACTURER: Allen & Hanburys, Ltd., Bethnal Green, London, E.2.

ESCRIPTION: A sterile solution of decamethonium iodide (1:10 bistrimethylammonium dijodide, or C 10).

DICATIONS: As a curarising agent to produce muscle relaxation in anæsthesia, and convulsive therapy.

OSAGE: 1.5 to 2.5 c.c. as an initial dose depending upon the patient and the requirements of the physician or surgeon; subsequent doses 0.5 to 1 c.c.

ow Supplied: 2.5-c.c. ampoules, each containing 5 mgm. decamethonium iodide, in boxes of 6, 12 and 100.

OTES: Eulissin can cause respiratory paralysis, if given in sufficiently large doses. The effect of Eulissin is sufficiently evanescent for controlled or artificial respiration to be an effective antidote.

ANTILUSIN

IANUFACTURER: Allen & Hanburys, Ltd., Bethnal Green, London, E.2.

DESCRIPTION: A sterile solution of pentamethonium iodide (pentamethylene 1:5 bistrimethylammonium diiodide or C5).

NDICATIONS: To be used in the investigation of hypertension and peripheral vascular diseases.

Dosage: 1.5 to 5 c.c. of the injection (see "Notes" below). (The initial dose of the preparation should never be greater than 2 c.c.).

How Supplied: In 2.5 c.c. ampoules, each containing 50 mgm. pentamethonium iodide in boxes of 6, 12 and 100.

VOTES: The fall in blood pressure may be marked following the administration of Antilusin. Adrenaline, nikethamide, methylamphetamine sulphate or other suitable cardiac stimulant should be at hand when Antilusin is used. Antilusin is not an ideal antidote to Eulissin.

CORRESPONDENCE

Correspondents may adopt an assumed name, but must in all cases furnish their real name and address to the Editor

Purchase Tax on Vitaminised Preparations

SIR,—Lest there should be any misundernding as to the attitude of the repretative trade organisations "consulted"
the Commissioners prior to the issue
the Notice reported on p. 718 of The
IEMIST AND DRUGGIST, November 26
ue, may I, on behalf of my Association,
phasise that "consultation" must not be
terpreted as acquiescence in the decisions.
is to be regretted that the Commissionhave, at this date, thought fit to reverse,
respect of vitaminised preparations conning added medicaments in nutritional
antities, a decision that has been operate since purchase tax was first imposed.
Yours faithfully,

J. S. Walmsley, Secretary, roprietary Association of Gt. Britain.

London, W.C. I.

Payment of the Shilling

SIR,—As doctors know more about their tients than chemists, I suggest they ould receive the shilling per prescription hich they should keep for themselves in dition to their present fee per patient. hat would meet their demand for ineased fees. Under such an arrangement, others of families with several children ould not be asked for the shilling unless ey kept on asking their doctor for trivial ems. Making a patient pay the doctor ne shilling for a tenpenny bottle of spirin tablets would soon end any racket" of getting something for nothing. foreover, the doctors would then have tore time to spend on those who were enuinely ill.

Yours faithfully, S.E.A.

Dividends and Dispensing Fees

SIR,—Many of us believe that chain and o-operative stores block the avenues to oung pharmacists owning their own busi-esses, upset a spread-over economy, and sult in economic dictatorship by minority roups in head offices. In pharmaceutial affairs this is particularly harmful, for hose in control of multiples and co-ops are lominated solely by the profit motive, and ure not interested in the profession of pharmacy. Until chemists are in the same

position as medical practitioners, who do not share their fees with unqualified shareholders, pharmaceutical fees will remain available for the payment of dividends to the unqualified shareholders of these concerns. The dictionary definition of a fee is payment for service rendered, especially professional service. It is obvious that it is not intended for the reward of shareholders, who give no professional service.

Yours faithfully,

Coupar Angus. A. C. Hossack.

Too Many Titles

SIR,-In the article published on p. 770 of the December 3 issue of THE CHEMIST AND DRUGGIST (a review by Dr. D. W. Adamson of the antihistamines and related drugs), I am amazed as a retail pharmacist to find no reference to the most popular of those drugs, namely Antistin (Ciba Laboratories, Ltd.). Nevertheless, the number of products mentioned raises again question whether nothing can be done by any society or group to prevent the multiplication of such analogous titles as Antistin, Anthisan, and now Histantin for virtually the same medicinal agent. Not only are they most confusing to the pharmacist, but with names so closely allied I would doubt if any doctor prescribing them is really clear in his own mind which preparation he really implies or intends. Yours faithfully, A. LEONARD HARRIS.

Shoreham-by-Sea.

[The published account of Dr. Adamson's lecture was contributed. The report included no reference to Antistin though we understand, from later information, that the product was mentioned both in the lecture and in discussion.—Editor.].

Salesmanship. — I watched a pharmacist selling a tooth-brush show a hairbrush, which reminded the customer Fido needed some flea powder and some condition powder, which brought up the subject of vitamins and a sore back, and eventually sold an elastic abdominal support. It took about ten minutes. Where other than in a pharmacy would this occur, or by whom other than a pharmacist could it be accomplished?—A correspondent in the "Canadian Pharmaceutical Journal."

TRADE REPORT

Spot quotations for pharmaceutical chemicals represent the prices for wholesale quaties of standard quality. Prices of crude drugs and essential oils vary as to brand or gra

28 Essex Street, W.C.2, Dec. 7 THE outstanding feature of the markets during the past week has been increases in home-trade prices of CAFFEINE and THEOBROMINE; the advance is respectively 2s. and 2s. 6d. per lb. for the alkaloids, and reflects increased costs of raw material. Makers of Borax and Boric acid advise reductions in commercial granular grades of these chemicals but other technical grades and pharmaceutical qualities are unchanged in price. Owing to the rise in acetic anhydride the market for ACETANILIDE is firmer. Prices of ASPIRIN are unchanged and a good export call is being received. Most sections of the mar-kets for CRUDE DRUGS have been quiet, although prices have been firmly held in view of current shortages of supplies. AGAR continues firm on the spot for this reason; forward prices, however, are understood to be at a lower level. There are few offers of CASCARA SAGRADA on the spot and little if any Chinese RHUBARB on the spot, with no supplies of the latter coming forward from origin. A fair business for export has reduced stocks of Ergor and it is understood that no offers are forthcoming from Portugal at present. IPECACUANHA remains in short supply. OLIBANUM is dearer in the primary market and rather higher prices are now being asked for spot supplies. Chinese CAMPHOR is tending easier but the synthetic product is dearer by sixpence per lb. MENTHOL remains quiet. A moderate business has been done in Essential Oils. Eucal-YPTUS continues firm and supplies are rather short on the spot. Lemongrass is a steadier market. It is reported that supplies of Dutch Spearmint will be coming forward shortly, Patchouli is scarce.

U.S. Drug and Chemical Report New York, December 2

In the markets for Pharmacettical and Fine Chemicals, Aspirin is commanding more attention. Tartrates are being watched because of reports that the import duty may be reduced. Demand, however, for many seasonal chemicals is still small owing to mild weather conditions. Turnover of wholesalers in the drug trade in September was estimated at \$151 millions, an increase of \$7 millions on the previous month and \$2 millions more than September, 1948. The value of stocks at the end of September was little changed compared with a year ago. In Crude Drugs, prices of Kobé Agar are declining. Spot quotations are now at \$1.90 per lb, and early January delivery is offered at \$1.80 per lb, in original bales. Export duties on several raw materials from India are expected to cause firmer conditions in

markets for a number of ESSENTIAL OI—following the export duty on pepper, is reported that India has placed a 10 cent, duty on sandal wood, Higher pri are asked for PATCHOULI OIL and it is available at less than \$17 per lb, Bois ROSE is also dearer and is now offered \$3.25 per lb.

POLYESTOL BANDAGES and the NATIONAL HEALTH SCHEME

BECAUSE certain Doctors are under the impression that Polyestol Bandages are prescribable under the National Health Scheme, Chemist friends complain that they sometimes have to reject prescriptions for these bandages and offend customers.

Needless to say, we greatly regret any inconvenience caused Doctors or Chemists. We have done our best to induce the Ministry of Health to make Polyestol Bandages prescribable under the Scheme. It appears, however, that being absolutely novel, they are not covered by the existing headings.

There is a large and growing demand for Polyestol Bandages in the home market, and appreciable sales overseas, even in the nationally important dollar areas. Nevertheless, sales would be considerably greater if Polyestol Bandages were available without restriction to every sufferer of those Rheumatic disorders which so greatly hamper the national economy.

The one way now open of obtaining the inclusion of Polyestol Bandages in the Scheme is for Doctors and Chemists to approach the Ministry through their usual negotiating bodies. We should be grateful for any help you can give in this respect.

Care of the breasts

Instructions issued by a Maternity Hospital to mothers, on discharge, include the following advice:—

"After feeding, the nipples should be dried carefully and smeared with a little 'Dettol' Ointment (not Dettol Cream or Dettol solution) and protected with a small piece of CLEAN LINT. Before the next feed the ointment should be wiped off".

Where there are signs of hardening of the nipples, richly emollient 'Dettol' Ointment will be found to have a welcome softening effect. Matrons of many hospitals report that where cracking has actually occurred, this actively antiseptic ointment is remarkably successful in promoting rapid healing.

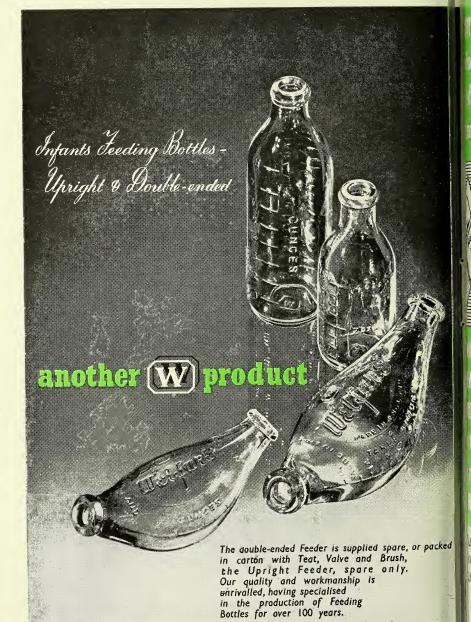

You may confidently suggest

DOLGIN FULFILS ITS PROMISES!

When Dolcin-the special compound of calcium succinate and acetylsalicylic acid - was launched on this market after its outstanding success in America and Canada, we promised you that this success would be repeated here.

Dolcin is now fulfilling this promise, offering turnover which increases steadily, month after month.

What is the reason for the success of Dolcin? The fact that Dolcin fulfils the promise made to sufferers through our nation-wide advertising campaign that Dolcin would give PROMPT and PROLONGED relief from the painful symptoms of all rheumatic disorders. This fulfilment is reflected every day through:-

- increased sales to hospitals;
- increased prescriptions from doctors;
- -increased volume of letters of appreciation from general public

Dolcin offers all-the-year-round sales, and particularly during the winter months, so keep your Dolcin displays in position. It will pay you handsomely to do so — especially with large-scale Dolcin advertising creating new customers every day.

PLEASE ORDER FROM YOUR WHOLESALER

SPECIAL ANNOUNCEMENT

All who are considering taking an optical qualification under the present regulations of N.A.O. and I.O.S. (D. Opt.) must register as students before December 31st, 1949.

After this date, new regulations come into force whereby it will be necessary for students to complete a full-time course extending over a period of three years.

Registration of students for optical tuition under the existing regulations are now being accepted, and it is important therefore to send us details *immediately* in order that the necessary forms can be completed within the time limit.
